HANOVER, PA – Emeco has launched two new color options for the Lancaster Collection by Michael Young.

The Lancaster Collection is a popular choice with designers for projects around the world. In response to our clients' requests, the collection has expanded to include two new color options, "Sand" and "White" for the seat and back of Lancaster Stacking Chairs, Counter Stools and Barstools. Lancaster seats and backs are made of die-cast aluminum with a powder coat finish. The wood legs are available in natural and dark stain ash wood.

Emeco first launched the Lancaster furniture collection by British designer Michael Young in 2010. The collection was Emeco's first foray into component-based design and our first collection utilizing wood. The responsibly harvested ash wood components are made by an Amish factory in nearby Lancaster County, Pennsylvania - providing the collection its name.

"I feel passionate about working with natural materials that live forever; wood and metal are really the materials that connect to the human so there was no question that the richness of their aging processes is a perfect combination. I feel that using wood creates a softer edge to a product whilst the aluminum keeps the sophistication and heritage."

Michael Young, Designer

ABOUT EMECO:

The American furniture company Emeco was founded in 1944 to make lightweight, non-corrosive, fire resistant and torpedo proof chairs for the US Navy. The classic 1006 Navy Chair was born. Made to last at least a hundred and fifty years, it was light, smart, functional and strong - because that was the best we could do. Today our craftsmen in Hanover, Pennsylvania continue to handcraft chairs that are so strong they are passed down through generations – that's how we define 'sustainability.' Emeco is leading the industry, exploring and innovating ways to use consumer and industrial waste, and environmentally responsible resources to create and build simple, timeless furniture. We work with the world's best designers and influential corporations including Philippe Starck, Norman Foster, BMW, Frank Gehry, Coca-Cola, Jean Nouvel, Konstantin Grcic, Nendo, and Jasper Morrison to make chairs that live up to the standards that we inherited from our founders with a vision to make a difference.
